ABOUT ME

I am a Full Stack Developer with hands-on experience in both frontend and backend technologies. I have worked on various projects that showcase my skills, which are available on my GitHub and personal portfolio website. In addition to web development, I also have a good command of design and productivity tools including Adobe Photoshop, Microsoft Word, Excel, and PowerPoint. I am passionate about building efficient, user-friendly applications and continuously improving my skill set.

SKILLS

WEB SKILLS

- HTML5
- CSS3
- JAVASCRIPT
- FIRE BASE
- NEXT JS
- BOOTSTRAP
- TAILWIND CSS
- REACT JS
- JSON SERVER
- NODE JS
- EXPRESS JS
- MONGODB
- REDUX TOOLKIT

PROGRAMMING SKILLS

- C LANGUAGE
- DATA STRUCTURE (Basic)

OTHER TOOLS & SOFTWARES

- GITHUB
- MS WORLD
- GIT
- MS EXCEL
- PHOTOSHOP
- MS POWERPOINT

WORK EXPERIENCE

Sridix Technology

5 Month Internship in MERN STACK DEVELOPMENT

- Worked extensively with React.js, Node.js, Express.js, and MongoDB in various full-stack projects.

- Gained hands-on experience with Next.js for server-side rendering and optimized web performance.

- Developed and maintained accounting-related web applications, focusing on performance, scalability, and accuracy and Contributed to AI-based projects.

- Built and deployed eCommerce platforms, including features like product manage, user authentication, and admin dashboards.

NULLCLASS E-LEARNING

2 Month Internship in MERN STACK DEVELOPMENT

- Built a Stack Overflow–like Q&A web application using MERN stack (MongoDB, Express.js, React.js, Node.js) during internship.

- Implemented features such as user authentication, question posting, answer submissions,

- Managed API development and backend logic with Express.js and Node.js, along with data modeling using MongoDB.

PROJECTS

Furni E-Commerce

Technologies: Next.js, React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a eCommerce website with modern features such as user authentication (login/register), product listing, product detail pages, add to cart, add to wishlist, and a fully functional checkout system.

- Created a separate Admin Panel using React.js, to full control the platform including:
  - Managing product inventory and website content
  - Viewing user data and order information
  - Processing and monitoring order status

- Used MongoDB for managing product data, user accounts, and order histories across both frontend and admin systems.

- Implemented Node.js and Express.js as the backend to handle API requests and server-side logic for both the website and admin panel.

- Website:= https://fur-stpre-next-js.vercel.app

- Admi Panel:= https://super-admin-xi.vercel.app

Web Scanner (Final Year Group Project)

Technologies: React.js, Python, MongoDB, Tailwind CSS

- Developed a Web Vulnerability Scanning Tool as part of a group project for the final year of our college program, aimed at enhancing cybersecurity awareness and practices.

- The tool allows users to scan websites for multiple vulnerabilities by simply entering the website URL into the selected tool module. The scanner automates the analysis and generates a detailed vulnerability report.

- Designed and implemented a report section where users can:
  - View previously scanned website reports
  - Download reports in a readable format for further use or record-keeping

- My primary role in the team was focused on design and front-end development, ensuring the application was intuitive, responsive, and user-friendly.
